

Anne Eisele
Chief of Staff
Maryland Energy Administration

Anne Eisele has specialized in the energy field for over 25 years. Prior to joining the Maryland Energy Administration (MEA), Eisele was director of sustainable initiatives at Georgetown University, where her responsibilities included working with students, faculty, staff and the Ivy Plus Universities to promote and implement sustainability initiatives. Eisele has also worked as director and manager of facilities management and construction at two large hospitals.

Eisele began her career in energy at Baltimore Gas & Electric, where she worked for 14 years consulting with industrial customers on energy initiatives and solutions, specializing in implementing and marketing energy and efficiency technologies. While with BGE, Eisele designed and supervised Conserve 2000, an industrial and commercial conservation program.

Eisele holds an MBA in marketing from Loyola University and a Bachelor of Science in mechanical engineering from University of Kansas. She is a US Green Building Council LEED Accredited Professional, Certified Energy Manager (CEM), and Certified Energy Procurement (CEP) Professional, and holds a FEMA Certificate for IS-00700 National Incident Management System (NIMS).
